IPRW Series

Wiegand Readers

SDC's IPRW series is the perfect companion for our IPPro® Controller.

The IPRW wiegand proximity reader is a sleek, sophisticated reader that will interface with most access control systems. It combines a 125KHz HID-compatible proximity reader and standard 26-bit wiegand output with compact design for surface or mullion mounting. An IP67 rated housing makes the IPRW reader suitable for use in indoor or outdoor environments. An LED indicator lights red to indicate power, or green to indicate an authorized access (controlled externally by host). The audible annunciator will indicate when a card is present or can be controlled externally. When paired with SDC's IPPro® Single Door Controller, compatibility is guaranteed.

MODELS

IPRW300 Weigand Reader, Mullion Mount
IPRW500 Weigand Reader, Single Gang Mount

STANDARD FEATURES

- Entry / Exit reader for IPPro controller
- Standard 26-bit weigand output

IP BASED ACCESS CONTROL

SDC's IPPro® line of IP-based access controllers allows expansion from one standalone door up to a 100-door "Grid." It's like having a local area network for your doors without all the headaches of an enterprise system. Every IPPro® controller comes with secure, built-in software to manage up to 32 doors from any standard web browser to allow for real-time monitoring, user management and audit trail up to 5,000 events. Or, download our FREE PLUS PC-Client software to control up to 100 doors from a single PC. IPPro® PLUS is a role-based access control software suite with different interface modules. SDC's IPPro® Injectors and Splitters are also available to help create a complete solution.
