

Grid Software Installation Guide

Table of Contents

1	Installation Prerequisites
2	Installing PLUS Grid Software

IPPro® PLUS is PC client software providing access control management of up to 100 doors. PLUS Grid software should only be installed on a single networked PC. Select a single PC where the database for all doors will be stored.

1 Installation Prerequisites

- Minimum PC Requirements:
 - CPU Core i5 (3rd gen)
 - OS Windows 7 or 10
 - RAM 4GB
 - Database Disk Space 20GB
- The user account used to install the software must have administrative rights.
- An internet connection is required to download software dependencies
- If reinstalling PLUS Grid, stop the "PLUS Grid Server" service and uninstall the PLUS Grid software first.

2 Installing PLUS Grid

- 1. Download & save the IPPro[®] PLUS Grid Software from the SDC website.
- 2. Unzip & extract the downloaded file.
- 3. Run **PLUSGridSetup-1.10.1.1d.exe** on the computer that will function as the PLUS database management PC.

Click Yes.

4. The "License Agreement" screen shows the PLUS Grid license agreement.

If you agree, select the "*I Agree*" option and click **Next** to begin the installation. If you do not agree to the license agreement, the **Next** button is not enabled and you will not be able to install the software.

5. Select "Local file database".

6. The "Choose Clients Install Location" screen prompts you to select where client software should be installed on user PCs. Since this is a single PC client, leave the drop-down menu as "Common Application Data".

7. The *"Select Destination Location"* screen allows you to specify the installation folder for PLUS Grid.

The installer recommends a default folder.

Setup - PLUS Grid 1.10.1.1
